LOCATION

Ukraine, Rivne

CORE SKILLS

Backend

- C#, .NET
- REST APIs, WebSockets, SignalR
- PostgreSQL, MS SQL, MongoDB, Redis
- Entity Framework Core, LINQ
- OAuth2, OpenID Connect, JWT
- CQRS, DDD, Event-driven
- Clean/Onion Architecture
- xUnit, NUnit

Frontend & Mobile

- TypeScript, JavaScript
- Angular, React
- React Native, Expo
- Progressive Web Apps (PWA)
- RxJS, NgRx, Redux
- HTML, CSS, SCSS

DevOps & Infrastructure

- Docker, Nginx
- CI/CD (Bitbucket)
- AWS S3
- Git, HashiCorp Vault
- Serilog, Sentry

EDUCATION

Master's in Computer Science

NTU "KhPI" (2022–2023)

2023

Summary

Full-stack engineer with 4 years of experience in web and mobile development. I focus on .NET and TypeScript to build reliable, scalable applications from scratch.

Experienced working with different teams and taking features from design to deployment. Quick to learn new technologies and adapt to changing project requirements.

Experience

ABNK Premium Systems — Full-Stack Software Engineer

06/2022 – Present

Project: Mobile content-based reading platform (iOS & Android)

- Successfully transitioned into mobile development and quickly mastered the required technologies.
- Built the mobile and backend architecture from scratch.
- Responsible for the entire development cycle, including app store publishing.
- Made technical and architectural decisions even when requirements were changing or unclear.
- Set up and maintained CI/CD pipelines and infrastructure for backend services.
- Managed mobile releases, monitoring, and crash reporting.
- Developed offline-first state management with cross-device data synchronization.
- Maintained a fork of an open-source library to fix bugs and add features needed for the project.
- Wrote tests for core mobile business logic.
- The app is in production and actively maintained.

Website: *theoneapp.org*

Project duration: *1 year, 7 months (ongoing)*

Stack: *React Native, Expo, TypeScript, Redux Toolkit, Jest, Sentry, .NET, Duende IdentityServer, PostgreSQL, Docker, Bitbucket Pipelines*

Project: CRM platform for social & educational sector

- Quickly learned a new framework to deliver a production-ready frontend.
- Built the backend architecture and frontend from scratch.
- One of the key engineers on the project: mentored team members and helped with architectural decisions.

Russian	Native

- Managed the full cycle of releases, CI/CD, and production deployments.
- Designed and built an interactive testing module for children (backend + frontend).
- Wrote tests for core domain logic to ensure reliability.
- Implemented secure authentication and secrets management using IdentityServer4 and HashiCorp Vault.
- Supported users and fixed production bugs.
- The system is running in production across several countries, supporting real users daily.

Project duration: 3 years, 4 months (ongoing)

Stack: .NET, Angular, Redux, PostgreSQL, Docker, Bitbucket Pipelines, IdentityServer4, xUnit, HashiCorp Vault

Early Project: Mobile game backend

- Refactored legacy backend code and improved database structure.
- Managed data migrations and moved the system to a new data model.
- Added new backend features.

Project duration: 5 months

Stack: .NET, MongoDB

Robotec — Python Software Developer / Engineer

10/2021 – 01/2022

- Developed software for robotic systems using Python.
- Worked on hardware integration and ROS (Robot Operating System).
- Built robotic systems by combining hardware and software parts.
- Designed robotic components in SolidWorks for assembly and integration.
- Fixed software and hardware-related issues.
- Supported clients with technical troubleshooting and product usage.

Stack: Python, ROS, Robotics, SolidWorks
